8	6 miles	10 miles	Off	6 miles (with pickups)	Tempo Run	6 miles	Hills 6 repeats	40

Training Schedule Instructions

All runs should be preceded with a good warmup, the pace should be conversational miles except for run indicated.

Pickups: 4-6 form accelerations during your run (form acceleration means for 100-200 meters to accelerate to a speed that is your one mile race pace- concentrate on your form then, don't worry about it at other times while running)

Hills: After a good warmup (1-2 miles) jog to a hill that has a moderate grade. Run the hill at your 5K race pace and walk/jog back down to recover. The hill should be long enough so that it takes about a minute to run it and then cool down (1-2 miles).

Tempo Run: Jog the first 2 miles to make sure you are totally warmed up then increase your pace to 30 seconds slower than your current 5K pace, maintain the pace for three miles then slow down and run the last mile easy. (Road Races can replace these)

Training Schedule Instructions

All workouts sessions should be proceeded by 10-15 minutes of stretching

This workout schedule involves alternating (at a comfortable pace) with walking. Times given in the chart are the total times (including both walking and running)

Weeks 1 & 2: Alternate running one minute followed by walking one minute

Weeks 3 & 4: Alternate running two minutes followed by walking one minute

Weeks 5 & 6: Alternate running five minutes followed by walking two minutes

Weeks 7 & 8: Alternate running seven minutes followed by walking two minutes

HAMPDEN ACADEMY CROSS COUNTRY SUMMER TRAINING RULES

1. Training runs should be done at a comfortable pace. (you should be able to carry on a conversation if you are running with someone else)
2. Remember we are building a base to work from this fall.
TOO MUCH SPEED TOO EARLY DOES MORE HARM THAN GOOD.
3. If you cannot finish a week of training (sick, hurt, traveling) do not go on to the next week, repeat the week you missed before going on.
4. Try to run a road race once every two weeks. This will give you a training run done at a faster pace.
5. Vary the terrain and routes that you run over. There is nothing that gets you sick of running faster than always running the same route.
6. Call other members of the team and get together for training runs at least twice a week if possible.
7. If after completing a week of training your legs are sore or you feel tired all the time repeat that week again before progressing at the next training week.
